

Do you live in an apartment or house built before 1978?

You may have lead paint on your walls and woodwork.

Lead poisoning is STILL a major problem in St. Louis.

Lead poisoning can cause learning disabilities, Attention Deficient Disorder, decreased IQ levels and other PREVENTABLE illnesses

LEARN HOW TO PAINT & REMODEL SAFELY!!

**St. Louis Lead Prevention Coalition is offering
FREE Safe Home Remodeling Workshops.**

We want to give you the information you need to protect your family from lead poisoning when you paint & remodel. Our instructor will give you the facts & information you need to update your home without causing a lead hazard.

A FREE STARTER KIT will be given to each St. Louis City household in attendance. This kits includes an 8-ct LeadCheck testing kit, respirator, rags, protective coveralls, safety goggles, cleaner, buckets, gloves, drop cloths, duct tape, scraper, spray bottle, heavy plastic bags, and more.

IF you have a community, school or church group that would like this free presentation brought to your site, please call Judith Riehl, Executive Director, St. Louis Lead Prevention Coalition, 314-664-9922

The funding of this project is financed through a grant from the Affordable Housing Commission of the City of St. Louis.
